

Investor Pitch — Lunim Film Suite

Lunim Film Suite is revolutionizing how films are financed, forecasted, and monetized. Built at the intersection of AI, blockchain, and film production, Lunim offers an integrated ecosystem where data, creativity, and transparency meet to unlock a new era of entertainment finance.

Our scalable business model combines multiple revenue streams — recurring subscription plans, NFT sales, and smart contract fees. Monthly financial analysis shows consistent growth across all sources, driven by a steady increase in AI adoption throughout 2024. This correlation demonstrates that integrating intelligent automation directly enhances decision quality, investor confidence, and platform stickiness.

At the heart of Lunim's innovation lies the ****AI-Powered Film ROI Forecaster**** — an advanced predictive engine that models box office performance, token valuations, and digital distribution outcomes. By analyzing production budgets, cast attributes, and market timing, it provides investors with scenario-based ROI projections (base, upside, downside), enabling smarter capital allocation.

Blockchain integration ensures transparency and trust. Every investment is tokenized through smart contracts, enabling real-time revenue tracking and ownership verification. This hybrid AI-Web3 framework reduces intermediaries, improves liquidity, and democratizes access to film financing.

As global film markets move toward decentralized funding, Lunim positions itself as a category leader with first-mover advantage. Our data-backed monetization logic, predictive analytics, and scalable architecture make the platform capable of exponential growth across creative industries.

Lunim is not just building technology — it's building a new economic model for storytelling. We invite investors to join us in shaping the future of film financing — intelligent, transparent, and borderless.
